

## **Food in Health Security (FIHS, 食品健康保障)**

**Mark L Wahlqvist MD, FRACP, FAFPHM, FAIFST, FTSE**

**Duo Li MD, PhD**

It has become clear in recent times that the food and health systems must work more effectively together to mitigate the growing threats to both food and health security and how they relate to each other. More than that, these combined security domains are an increasingly important part of the broader quest for human security as espoused by the United Nations (UN) System. This has global relevance, because these issues reflect the current conjunction of climate change, limited energy and usable water supplies, financial system failure, population increases and demographic shifts, limited arable land (some now used for biofuels) and shortages of especially nitrogen (from petrochemicals) and phosphorus fertilisers, with rising fuel prices. But there is a need to address these security concerns on an Asia Pacific Regional basis. To this end, a process was set in train in August 2009 to build an Asia Pacific FIHS Network of like-minded, but inter-disciplinary parties who could work together to identify, encourage interest in and develop strategies to manage the required agenda. The papers which represent at least some of the relevant and encouraging technology platform have been published in APJCN in late 2009. They are freely available on the Journal website: <http://apjcn.nhri.org.tw/server/APJCN/Volume18/vol18.4/Finished/index.php>

目前已经日益明确，食品和卫生系统必须一起更加有效的发挥作用，以缓解由食品和卫生保障需求和它们怎样协同作用所带来的对人们的日益增长的威胁。不仅如此，这个联系在一起的领域已经是联合国组织所提出的人类安全保障这个更加宽广的领域越来越重要的组成部分。这个问题具有全球性，因为它反映了目前气候变化，有限的能源和可使用的水资源，金融危机，人口增长和结构变化，有限的耕地（有些现在被用来种植生物燃料）和由于日渐上涨的燃料价格带来的土壤肥力缺失，尤其是氮元素（来源于石油化工制品）和磷肥等问题相互交织在一起现状。但是，目前存在着在亚太地区的基础上解决这些安全保障问题的可能。为此在 2009 年 8 月，建立亚太地区食品卫生保障网络的筹备工作已经就绪，有共同志向但来自于不同学科的人将携手合作，一起寻求获得资助，并为此机构所需议程制定发展战略。一些包含相关鼓舞人心的技术平台的文章发表在 2009 年底的亚太临床营养学杂志（APJCN）上。你可以在杂志网站上免费获取这些文章：
